Communications Equipment and Services – Drilling Prequalification Questionnaire**

1 INTRODUCTION

1.1 Description

EnCana Corporation is proposing to develop its Deep Panuke gas prospect located offshore Nova Scotia. The Project Field Center, which will contain all of the main facilities, will be located approximately 250 km southeast of Halifax, approximately 47 km west of Sable Island and in 45 metres water depth.

The Project involves production and processing of gas offshore and transport, via subsea pipeline, of market-ready gas to Goldboro, Nova Scotia to an interconnection with the M&NP main transmission pipeline for further transport to markets in Canada and the northeast United States.

1.2 Scope

EnCana is seeking to pre-qualify experienced companies for the supply of telecommunications systems and services for the Deep Panuke Drilling Program. The Drilling Program will use a jack-up rig. Although subject to change, the Drilling Program is currently scheduled to start in Q2 2009 and is expected to be complete by the end of Q4 2009. This will require that all telecommunications systems be available quayside Halifax for installation one month prior to the start date.

Subject to modification, the Drilling Program will require rig/shore voice and data satellite services, a rig located telephone system, a rig located infrastructure to support voice and data services, a telecom UPS system with a shutdown system, backup satellite voice communications and a Field radio system. Potential exists for the inclusion of an NDB system, an S-band radar system and a satellite based Entertainment system.

Interested parties must include provision of all necessary equipment and personnel to supply, install and maintain the required systems. Installation work shall be completed prior to the commencement of Drilling Operations.

To provide these services, Contractor must be qualified and demonstrate that they have suitable processes and capability to supply the required systems within the Project Schedule dates outlined. They must also be able to demonstrate previous experience supplying and maintaining similar services.

2 INSTRUCTIONS

Respondents shall complete and submit the Prequalification Questionnaire, including Appendix A attached hereto.

Respondents shall provide information as instructed in the Questionnaire. In some cases supplementary information is requested to support the answers. A Contents List, that clearly details the documents that are included in support of the submission, shall be provided. Any answers, which refer to respondents' documents that are included to support the Questionnaire, should specify the page(s)/section(s) containing the information. The page(s)/section(s) referenced should be marked to indicate the section to which it refers. Separate sheets, as necessary, should be used to provide additional information.

Respondents are advised that the information requested in the Questionnaire are minimum requirements, sufficient for the EOI. For those companies invited to bid, additional detailed information will be requested by EnCana at the Request for Proposal stage to adequately assess bidder's capability to perform the work.

3 CORPORATE & FINANCIAL CAPABILITY

3.1 Company Name and Offices

Name: _____

Home Office Address: _____

Telephone: _____ Fax: _____

Nova Scotian Office Address: _____
(If relevant and if different than above)

Telephone: _____ Fax: _____

Registered Office Address: _____
(If different than above)

Telephone: _____ Fax: _____

3.2 Company's Corporate Status

Autonomous Unit _____

Subsidiary _____

Partnership _____

Joint Venture _____

List Partnership / Joint Venture members

Name: _____

Address: _____

Name: _____

Address: _____

3.3 Company's officers and directors

Name: _____

Title: _____

Name: _____

Title: _____

Name: _____

Title: _____

3.4 Company's ultimate parent company or controlling shareholder

Name: _____

Address: _____

3.5 Company's Financial Capability

Respondent shall provide a copy of its audited financial statements for the most recent fiscal year ended.

4 TECHNICAL CAPABILITY

4.1 Manufacturing Facility Location

Respondents shall provide name, location, and details of the proposed suppliers that would be used to produce the systems specified.

4.2 Previous Experience

a) Provide details on past experience with supply of similar sized Projects. List project details and personnel used.

4.3 Capability

a) Provide anticipated team organization and skills capability for the specified work scope.

b) If and as required, what certification agency is normally used by your Company for the certification process?

4.4 Sub-Suppliers

Provide details of any Companies anticipated as Sub-Suppliers .
